OBJECTIVE

Data science undergraduate with hands-on on-site experience in IoT systems, Building networking workflows and AI/ML projects, seeking entry-level roles or internships in data analysis, machine learning, or applied analytics.

SKILLS

- Programming:** Python, R, SQL, C++, Networking Fundamentals
- Data Analysis & ML:** Pandas, NumPy, scikit-learn, Regression, Time Series, ANOVA
- Visualization:** Power BI, Tableau, Matplotlib
- Tools & Platforms:** Git, GitHub, ESP32, Arduino, Cisco Packet Tracker

CERTIFICATIONS

- Anthropic Introduction to MCP
- Anthropic Advanced MCP servers
- 20+ AI tools Experties

ACADEMIC BACKGROUND

Inspiria Knowledge Campus (2023-Present)

Pursuing B.SC in data science from Inspiria Knowledge Campus, Siliguri

Higher Secondary (2021-2023)

Completed Higher Secondary education from Modi Public School, Siliguri (2022)

Secondary Education (2011-2021)

Completed Secondary education from SBOA Public School, Assam (2020)

Experience

Groveus Informatics Pvt. Ltd. (Sept-Dec2025)

Internet of Things Intern

- Gained practical on-site experience with ESP-32 microcontrollers and IoT systems.
- Assisted in developing automated workflows and integrating hardware with data streams.
- Collaborated with team members on AI/ML applications for industrial efficiency.

E-Cell Inspiria Knowledge Campus (Nov-May 2026)

AI/ML lead Intern

- Actively contributing to the Entrepreneurship Cell to foster a startup culture on campus.
- Assisting in organizing workshops, networking events, and entrepreneurial challenges.
- Collaborating with student teams to streamline communications and event operations.

InSeed Inspiria Education Services PVT. LTD

AI/ML Engineer Intern (May-Present)

- Developed and supported AI-based solutions for internal projects and startup initiatives.
- Assisted in designing AI workflows and automating routine processes.
- Collaborated with student teams to streamline communication and operational activities.
- Contributed to workshops and events promoting AI, innovation, and entrepreneurship.

Projects

News Sentiment Stock Predictor

Python | NLP | Sentiment Analysis

[Github](#)

- Analyzed real-time financial news headlines using NLP to quantify market sentiment.
- Modeled correlations between public sentiment and historical stock price movements to forecast trends.
